

## ENGLISH

During the first part of this half term, we will focus on non-fiction and the children will write explanation texts explaining how the heart works.

We will then move onto persuasive writing to persuade someone why it is important to have a healthy lifestyle and diet.

## ENRICHMENT OPPORTUNITIES

We will be participating in many active science investigations during this topic including dissecting an animal heart.

We will bring all of our knowledge and skills together to present a workshop to parents to promote a healthy lifestyle and diet.

We will also have a visit from a parent to explain how blood pressure monitors work and why it is important.

## MATHS

We continue our work in Maths this half term by focusing on Fractions, Decimals and Percentages.

## PE/GAMES

During our PE we will be keeping our bodies strong and healthy by completing HIIT workouts. We will link this to our work in Science by taking heart rate measurements before and after exercise. In Games, we will focus on basketball.

## SCIENCE

The main focus of this ILP is Science and as such we will study: the heart and how it works; blood and the circulatory system; what affects our heart and how we can keep it healthy and strong.

We will show all of the skills and knowledge we have learnt this topic by dissecting an animal heart and explaining the role of the veins, arteries and chambers.

## YEAR 6 – Autumn Term 2019

## HISTORY

During History lessons, we will begin to look at some of the changes in medicine over the previous 200 years.

## RE

The children continue to prepare for Confirmation in January 2020.

We will also be preparing and performing our Christmas Service

## DT

In DT lessons we will discuss nutrition and the vitamins and minerals our bodies need to remain healthy and strong. We will also look at how we can prepare a healthy meal on a budget!
