## Key Instant Recall Facts

## Year 6 Autumn 1

## I know the multiplication and division facts for all times tables up to $\mathbf{1 2 \times 1 2}$

The Year 6 children should already know ALL the times tables up to $12 \times 12$. The aim is for them to recall these facts instantly. This half term is a chance for Year 6 children to consolidate their knowledge of multiplication and division facts and to increase their speed of recall.

| $7 \times 11=77$ | $8 \times 12=96$ |  |  |  |  |  |
| $7 \times 12=84$ |  |  |  |  |  |  |

They should be able to answer these questions in any order, including missing number questions e.g. $7 \times \square$ $=28$ or $\square \div 6=7$. Children who have already mastered their times tables should apply this knowledge to answer questions including decimals e.g. $0.7 \times \square=4.2$ or $\square \div 60=0.7$

## Top Tips

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could start with one particular times tables and ensure they know all of them before moving onto another times table.

Speed Challenge - Take two packs of playing cards and remove the kings. Turn over two cards and ask your child to multiply the numbers together (Ace = 1, Jack = 11, Queen = 12). How many questions can they answer correctly in 2 minutes? Practise regularly and see if they can beat their high score.
